

IN THE SPECIFICATION

Please cancel the specification of the subject U.S. patent application, as filed, including the Code Number Key, as set forth in the accurate translation of WO 2004/094145 as published and as amended during prosecution, in favor of the concurrently submitted Substitute Specification. That substitute specification is the result of the entry into the accurate translation of a cross-reference to related applications and of suitable section headings; the deletion of the Code Number Key and of references to the claims; the correction of minor errors in grammar, punctuation, and spelling and a general revision of the accurate translation to place the specification of the subject U.S. patent application in a better form in accordance with U.S. practice. These various changes do not constitute any new matter. A marked-up copy of the accurate translation, showing the changes made thereto, to arrive at the Substitute Specification, is enclosed for the Examiner's review.
